

Ski Safety GPS

Tristan Lai – Logbook

Milestone 1

Date	Description	Notes
January 19 th , 2025	Worked on revising the project plan from previous ETEC306 semester.	Went into detail of the time management plan and assigned which group members were meant to do what tasks.
January 26 th , 2025	Researched previous semester project plan.	Revised previous project for elderly safety and read documents on the project functionality.
February 8 th , 2025	As a group gathered the hardware from the previous semesters project and attempted to get functionality.	Mostly Arduino interaction with the Blue Pill board.
February 9 th , 2025	Revised the system block diagram. Created system design notes.	Many functions were generalized during the previous semester. Decided to add more detail into the design. Produced the necessary functions of the project and the general flow of how the functions will communicate with the hardware.
